2. Enjoy multiple resources to assess: positive and negatives, rubrics, calculations based on attendance...

3. With the calculation columns and the efficient Formula Generator you will get the average marks of your students with a format very similar to Excel.

Hide, Sort, Edit and Delete the columns you have created by clicking on them.

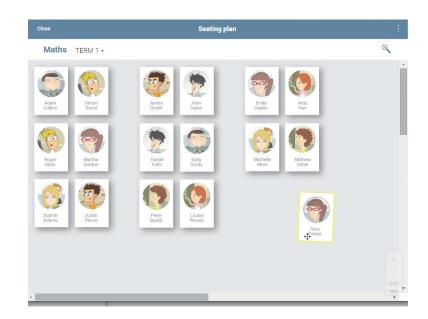

Attendance list

- **1. Record** the daily attendance of your students with the predetermined icons or choose those you want to use and define the corresponding value to evaluate the attendance.
- **2. Apply** the filter to hide the attendance of a certain period.
- **3. Export** the group's attendance in csv (Excel) format or a certain student's attendance with the individual report.

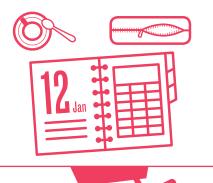

Seating plan

- **1. Create** up different seating plans for each group-class and see the photo and the name of the students.
- **2.** Freely **distribute** the students in the classroom and create workgroups.
- **3. Pick** a random student within the plan using the magic wand.
- 4. Hide and display students.

Class diary and planning

1. Each group-class has its own diary.

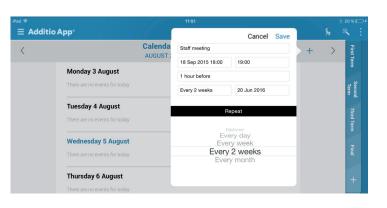

2. You will have access to the weekly vertical view that will allow you to visualize the schedule and the follow-up of the group-class.

3. You will be able to attach documents and images

to use them in the classroom.
